SUPPLIERS

mtt

MTT Corporation

株式会社 七星科学研究所

NANABOSHI ELECTRIC MFG CO.,LTD

Focuses on developing and providing **insulation signal converters** since 1975. They offer a variety of compact and **cost-effective signal converters** for industries like steel, power, and automotive testing, emphasizing high quality and reliability with up to a 7-year warranty.

Develops, manufactures, and sells **various connectors** (waterproof and non-waterproof) for communication, industrial, medical, power, measurement, and electronic devices. They also handle **die-casting** and **optical communication equipment**.

KOKUSAI
DENGYO

STEP INTO THE FUTURE.

HASEGAWA®

Specializes in manufacturing and selling automation parts, electronic equipment, and systems. They are known for their diverse range of **foot switches** used in industrial machinery, medical devices, and more.

Primarily manufactures and sells a wide array of **testers** (low, high, extra-high voltage AC/DC), **relays**, **current transformers**, **grounding transformers**, and related measurement tools, including LED work lights.

Yashima Sangyo's commitment to quality is reflected in our partnerships with some of the world's most reputable manufacturers. These collaborations enable us to offer products that meet the highest standards of performance and reliability.
